0131 Transformation of a single family house in Croissy sur Seine (78)

Net floor area: 131 m²
Private client
General contractor: Entreprise REMS
Mr. & Mrs. D.
78290 Croissy sur Seine - France
Finished

*By moving the existing stairs from the core of the house, a central void is created that separates it into two parts.
This main void becomes the space for a game with the “servant spaces.” Habitually hidden, rejected... here they become exposed, suspended overhead, and illuminated from the roof.
This strategy allows to integrate numerous volumes of storage in the rooms without wasting those “served spaces.”*
